DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 4, line 1, delete ~~3~~ and add "1".

Allowable Subject Matter

2. Claims 1, 4-21, and 23-63 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1, 4-21, and 23-63 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 12, "at least one of the input elements of the first surface is further configured to selectively map to more than one text symbol function". In claim 17, "at least one of the input elements of the first input assembly is further configured to map to more than one input function associated with a selected one of the plurality of applications". In claim 24, "at least one of the input elements is further configured to map to a plurality of symbols in a data input mode, wherein each of the plurality of symbols is associated with a unique index position identifier". In claim 28, "at least one input element is mapped to more than one text function, and one or more selection elements in a finger-manipulated input assembly, wherein each selection element is mapped to a unique shift position". In claim 43, "at least one of the input elements of the first input assembly is further configured to map to more than one input function associated with a selected one of the plurality of applications". The closest prior art Liebenow (6,909,424) discloses a hand-held electronic device with first and second input assemblies on first and second surfaces, respectively, however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
